

SIMS INDEPENDENT

Instant intelligence for senior leaders, teachers and governors

SIMS Customised Reporting Service

The SIMS Customised Reporting Service provides you with instant access to the key information you need on a single data dashboard.

The reports can be personalised for any individual role – from helping a head of year understand patterns of pupil progress to a version for governors to view wider school performance from which personal pupil details have been removed.

Senior leaders, teachers and governors can access the information they need instantly as the reports are emailed straight to your inbox every day.

Simply identify the areas within your school you wish to focus on and we'll have you up and running straight away.

Key benefits

Bespoke reports presented on one simple data dashboard

Instant access to data for busy staff

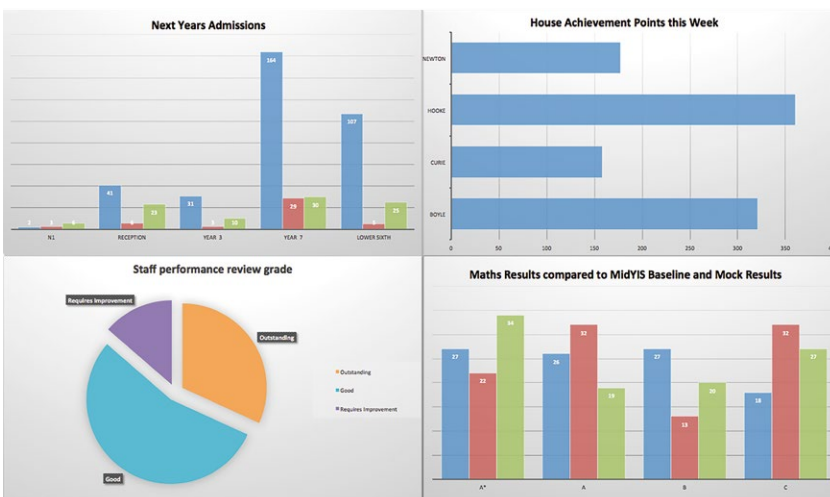

Choose how often you'd like the reports to be sent to you

Access the reports via mobile devices

The flexibility to design your own data dashboard, as and when you need to.

How SIMS Customised Reporting works

- Identify the key areas that are important to you such as monitoring achievement of particular groups or exam results by subject or teacher
- Choose who within your school receives the reports
- Choose relevant date ranges – e.g. 'last 7 days'
- Select how often you'd like to receive your reports

- Reports are automatically updated overnight in SIMS, with the results consolidated as charts on a single Excel® worksheet
- Customised data is then pushed to staff and/or governors via a daily email ready to access the next day on a PC, laptop or mobile device

- Analyse pupil achievement and conduct
- Compare class attendance and lateness
- Monitor staff absence and performance

- Monitor prospective pupil numbers
- Monitor fee income
- Track student performance

Customise reports for governors which exclude specific student or staff details.

The flexibility to view the reports using any device.

Full pivot table functionality to analyse other information you need. Clicking on each bar within the reports reveals underlying further data for the whole picture.
